PRESSURE-SENSITIVE LABEL STOCK STORAGE CONDITIONS AND SHELF LIFE

Storage Conditions

- The storage and converting conditions should be as close to TAPPI standards of 73°F (23°C) and 50% relative humidity as possible.
- Products should be stored in their original stretch wrap until the time they will be used on press.
- The material should be allowed to acclimate to your press room's environment for 24 hours before the stretch wrap is removed and the roll is loaded onto the press.
- Keep rolls off the concrete floors and away from any other sources of moisture contamination.
- Rotate your stock. Use the oldest inventory first.

Shelf Life

- Pressure-sensitive label material should be used within one year from date of purchase, unless otherwise stated on the data sheet.
- The one-year shelf life is part of our standard conditions of sale on all products. Green Bay Packaging will not accept any claims for pressure-sensitive material older than one year.
- The label stock should retain its functional performance after a year. The acrylic adhesive is chemically stable and will not oxidize or lose tack, and the silicone release level should remain the same.
- After application, the adhesive should not degrade or lose tack over time. However, in some applications, including very high moisture and temperature for example, adhesive performance may suffer.

LAYFLAT LABEL MATERIAL RECOMMENDATIONS

- Good layflat performance can be expected when label stock is converted in an environment where the temperature range is between 60°F and 80°F (16°C and 27°C) and the relative humidity is between 40% and 60%.
- The material should be allowed to acclimate to your facility's environmental conditions for three days before it is converted.
- Keep rolls off of concrete floors and away from any other sources of moisture contamination.
- Rotate your stock. Use oldest inventory first.
- Avoid long-term storage. For best results, material should be utilized by the end-user within six months of manufacture.
- We are not able to guarantee layflat performance of labelstock produced with some removable adhesives.

TERMS AND CONDITIONS

- 1. **Entire Agreement.** These Terms and Conditions shall constitute the entire agreement (the "Agreement" or "Terms and Conditions") of Green Bay Packaging Inc. ("Seller") and Buyer with respect to the subject matter hereof. These Terms and Conditions are controlling and shall supersede any prior or contemporaneous agreements, understandings or representations, oral or written, relating to the subject matter hereof. These Terms and Conditions shall govern in the event of any conflict between these Terms and Conditions and any provision contained in any subsequent Purchase Order or otherwise, the terms of which, whether conflicting, supplemental or otherwise, are hereby expressly rejected.
- 2. **Shipment, Title and Risk of Loss.** Unless otherwise mutually agreed in writing, shipment shall be F.O.B. Origin. Title and risk of loss pass from Seller to Buyer upon delivery to a carrier.
- 3. **Freight.** Shipments are F.O.B. Origin, with full freight allowed on shipments of 9 MMSI or more. Inventory and non-inventory items may be combined to meet the 9 MMSI minimum requirement for full freight allowed shipments, provided entire order is shipped at one time from one location to one destination. For all shipments fewer than 9 MMSI terms are F.O.B. Origin, freight prepaid and added, in which the shipping and handling charges shall be added to the face amount of the invoice.
- 4. **Payment.** Net 30 days following the date of invoice. 1% discount on payments received within 10 days of date of invoice. Amounts not paid in full within 30 days of date of invoice will be subject to a service charge of 1% per month on the unpaid balance to be included on each month's statement until paid in full.
- 5. **Taxes and Other Charges.** In addition to any price herein provided, Buyer shall be liable for any tax, fee or other charge imposed on Seller at any time upon the sale and/or shipment of the goods sold hereunder, now imposed by federal, state, municipal or any other governmental authorities or hereafter becoming effective for or during the period hereof.
- 6. Cancellation or Default by Buyer. This order may not be cancelled in whole or in part by Buyer except with Seller's written consent. If at any time, in Seller's opinion, Buyer's credit is impaired, or if Buyer shall fail to pay to Seller any amount when due, under this Agreement or any other agreement, or if at any time Buyer shall indicate an intention to refuse to perform or on an inability to perform its obligation hereunder, Seller may at its option terminate this Agreement as regards further shipments and thereupon all obligations of Buyer with respect to shipments previously made shall become immediately due and payable. In the event of such termination, Buyer shall remain liable to Seller for any and all loss or damage sustained due to Buyer's default.
- 7. **Force Majeure.** Seller shall not be liable for any loss, damage, delays, changes in shipment schedules or failure to deliver caused by any event beyond its reasonable control, including, without limitation, accident, fire, actual or threatened strike or riot, explosion, mechanical breakdown (including technological or information systems), plant shutdown, unavailability of or interference with necessary transportation, any raw material or power shortage, compliance with any law, regulation or order, acts of God or public enemy, prior orders from others, or limitations on Seller's or its suppliers' products or marketing activities or any other cause or contingency beyond Seller's control. If by reason of any such circumstance, Seller's supply of the goods herein specified shall be insufficient to meet all requirements, including its own, Seller shall have the right, at its option and without liability, to allocate its available supply of goods among its present and future customers, including Seller's affiliated divisions and companies, in such manner as Seller deems equitable.
- 8. Limitation on Warranty and Remedies. Seller warrants that the goods to be sold hereunder will conform to the description on the face hereof, and any specifications provided in writing to Buyer and will be of Seller's standard quality. Buyer represents that it has used its own independent skill and expertise in connection with the selection and use of the goods purchased pursuant to this Agreement, and that it will independently determine the suitability for each use for which it is purchased. When UL recognition is provided to Buyer, goods will meet applicable guidelines of Underwriting Laboratories. THIS WARRANTY IS EXCLUSIVE, AND EXCEPT AS EXPRESSLY SET OUT IN THIS AGREEMENT, SELLER MAKES NO OTHER WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, AND DISCLAIMS ALL OTHER WARRANTIES, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. IN THE EVENT THE GOODS ARE NOT IN COMPLIANCE WITH SELLER'S WARRANTY HEREUNDER, BUYER'S SOLE REMEDY SHALL BE A CREDIT FOR THE COST OF SUCH GOODS OR, AT SELLER'S OPTION, REPLACEMENT OF SUCH GOODS. SELLER SHALL UNDER NO CIRCUMSTANCES, WHETHER FOR A FAILURE OF ITS LIMITED REMEDY OR OTHERWISE, BE LIABLE TO BUYER OR OTHERWISE FOR SPECIAL, INCIDENTAL, DIRECT, PUNITIVE, OR CONSEQUENTIAL DAMAGES. NO WAIVER, ALTERATION, ADDITION OR MODIFICATION OF THE FOREGOING CONDITIONS SHALL BE VALID UNLESS MADE IN WRITING AND SIGNED BY AN OFFICER OF SELLER. All warranties and certifications are made by Seller to Buyer and to no other parties including, but not limited to, Buyer's customers and any other end users.
- 9. **Limitation of Actions.** Any claim must be made in writing within 10 days after receipt of goods, if for quantity, or within 30 days after receipt of goods, if for quality, loss of or damage to goods, and the goods must be held available at Buyer's place of business for Seller's inspection. Any action for breach of this Agreement, other than for non-payment hereunder, must be commenced within one year of the date of shipment, or due date of delivery in the event of non-delivery, of the particular shipment upon which such claim is based. No claim may in any event be made after goods have in any way been used or processed by the Buyer. Buyer's remedies set forth herein are exclusive and the total liability of Seller for damages with respect to this Agreement, or anything done in connection therewith, shall be limited to the purchase price of the particular shipment with respect to which such damages are claimed.
- 10. **Returns and Transit Damage Claims.** No goods may be returned to Seller without Seller's written consent. Goods returned without Seller's prior written authorization will be refused. Buyer must note any shortage or damage on the delivery receipt at the time of delivery. Any concealed damage must be reported to the delivering carrier within 5 days, and the entire package must be retained at Buyer's place of business until after a damage inspection report is issued by the carrier. The following documents must accompany any transit damage claim: original paid freight bill; original or certified copy of the original bill of lading; copy of the invoice for the shipment; copy of the destination inspection report or delivery receipt noting the shortage or damage.
- 11. Governing Law. This Agreement shall be governed by and construed in accordance with the internal laws of the state of Wisconsin, U.S.A.
- 12. **Amendment.** This Agreement shall not be amended except by a writing signed by an officer of the Seller and specifically stating that it is an amendment.

FILMS: POLYPROPYLENES	(VARIABLE	: IMAGING) (cont.)	
2.6 MIL THERMAL TRANSFER WHITE LABEL-LYTE™	026TT	2.6 mil White Label-Lyte BOPP with a thermal transfer top coat. Designed for variable imaging applications where moisture resistance, or long-term performance, is required. Label-Lyte is a trademark of Jindal Films America.	2.6 66.0
THERMAL TRANSFER WHITE LABEL-LYTE™	030TT	White Label-Lyte BOPP with a thermal transfer top coat. Label-Lyte is a Trademark of Jindal Films America.	3.0 76.0
3.0 MIL SYNTHETIC MEDIUM SENSITIVITY FILM	070MK	A 3.0 mil BOPP direct thermal film. Medium degree of sensitivity. Top coated for durability. Use when moisture and environmental resistance are important. Dark image for excellent ability to be read and scanned.	3.0 76.0
3.0 MIL TC MATTE WHITE BOPP	075WP	A 3.0 mil top coated matte white BOPP. A synthetic paper, it can be used with thermal transfer, flexography, screen, letterpress, and other print	3.0 75.0
3.3 MIL SYNTHETIC MEDIUM SENSITIVITY FILM	084MB	A 3.3 mil BOPP direct thermal film. Top coated for durability. Medium degree of sensitivity. Use when moisture and environmental resistance are important. Good stiffness for ease of dispensing. Dark image for excellent ability to be read and scanned.	3.3 84.0
SYNTHETIC MEDIUM SENSITIVITY FILM	095RK	4.1 mil white BOPP film with direct thermal coating. Top coated for durability. Medium degree of sensitivity.	4.1 104.0
TOP COATED KIMDURA® FPG 95	095TK	A 4.2 mil (92 g/m²) Kimdura® BOPP specially top coated for thermal transfer, dot matrix, ion deposition and digital printing. Registered Trademark of Neenah Paper, Inc. © 2007 NPI All Rights Reserved.	4.2 107.0
SYNTHETIC MEDIUM SENSITIVITY FILM	096RK	4.1 mil white BOPP film with direct thermal coating. Produces a dark image. Top coated for durability. Water and environmental resistant. Use for industrial labeling, ski lift tickets, baggage tags, product labels, and retail shelf labeling.	4.1 104.0
SYNTHETIC MEDIUM SENSITIVITY FILM	96RKE	4.0 mil white BOPP, no phenols added film, with direct thermal coating. Produces a dark image. Top coated for durability. Water and environmental resistant. Use for industrial labeling, ski lift tickets, baggage tags, product labels, and retail shelf labeling.	4.0 101.6

December 7, 2025

Target (MILS) Code Description (Microns) Title FILMS: POLYPROPYLENES (VARIABLE IMAGING) (cont.) MATTE WHITE BOPP 100WP A 3.7 mil top coated matte white BOPP. UV resistant. For use with thermal 3.7 transfer and other print methods. Consider for drum label, outdoor and 95.0 other demanding applications. FILMS: POLYPROPYLENES (METALIZED) 018MT 1.85 MIL SILVER 1.85 mil clear BOPP metalized on the back for durability. Top coated for 1.9 47.0 **METALIZED BOPP** print compatibility with water-based and UV flexo, and UV inkjet. Great stiffness for automatic application. Ideal for bright label graphics that will catch the eye of the consumer. 2.0 MIL SILVER METALIZED 021MU A 2.0 mil BOPP metalized on the back side for a shiny silver appearance. 2.0 **BOPP** Top coated for printability with a wide range of ink systems. 51.0 FILMS: POLYSTYRENES 1.5 MIL CLEAR 015PN A 1.5 mil corona treated clear polystyrene. Perfect for use as a base for 1.5 **POLYSTYRENE** peel-off coupons and booklets. 38.0 2.0 MIL CLEAR 020PN A 2.0 mil corona treated clear polystyrene. Stiffness allows easy 2.0 **POLYSTYRENE** converting and dispensing. 51.0 2.5 MIL CLEAR 025PN 2.5 A 2.5 mil corona treated clear polystyrene. Stiffness allows easy **POLYSTYRENE** converting and dispensing. Great for use as a mailing tab. 64.0 2.5 MIL WHITE 25PSW A 2.5 mil corona treated white polystyrene. Stiffness allows easy 2.5 **POLYSTYRENE** converting and dispensing. 64.0 FILMS: POLYESTERS 2 MIL CLEAR TOP COATED 020MY A very clear, top coated polyester film. Top coating allows for printing with 2.0 **POLYESTER** most standard flexo and UV letterpress inks. 51.0 2.0 MIL VALUE WHITE 2VWPT A matte, white polyester film, top-coated for water-based and U.V. 2.0 **POLYESTER** flexographic ink adhesion, and thermal transfer printing. Designed for 50.0

durable applications – resistant to heat and chemicals. High tear strength.

			Target (MILS)
Title	Code	Description	(Microns)
FILMS: CLEAR SPECIALTY			
2 MIL CLEAR ACETATE	020AC	A 2.0 mil clear acetate film with good clarity and printability. It is compostable. Has relatively low tear resistance and is good for tamperproof applications. Meets the ASTM D6400 compost standard.	2.0 51.0
FILMS: WHITE SPECIALTY			
TYVEK®	046TV	DuPont [™] Tyvek® (1073D) is a 7.5 mil, strong, transluscent polyolefin with exceptional strength and moisture resistance. DuPont [™] and Tyvek® are trademarks or registered trademarks of E.I. du Pont de Nemours and Company.	7.6 191.0
PIGGYBACKS			
54# SEMI-GLOSS	054SG	54# (78 g/m²) C1S bright blue-white semi-gloss. High strength property makes it ideal for wide web high-speed stripping and die-cutting. Smooth surface provides excellent printing with flexo, UV letterpress, and offset methods. FSC®-certified paper.	2.6 66.0
60# DULL LITHO	061DL	60# (89 g/m²) high quality, dull finish litho offering excellent print and die-cut properties. Good for flexographic and offset printing. FSC®-certified paper.	3.0 76.0
VALUE THERMAL TRANSFER	VALUT	A 42# (62 g/m²) top-coated, thermal transfer sheet that offers high performance at a lower cost. Strength and opacity are comparable to conventional thermal transfer facers. Exceptional print quality, especially for flood coating. FSC®-certified paper.	2.8 70.0

	Minimum Application Temp	Service Temp Range	Description
COLD-1	ГЕМР		
00552	-20°F -29°C	-65° to +120°F -54° to +49°C	Acrylic freezer adhesive used in many film wrapped meat and dairy applications, including the more difficult blast freeze environment.
00720	-20°F -29°C	-65° to +180°F -54° to +82°C	A soft, general purpose, all-temperature acrylic adhesive for paper and film labels. Adheres to a variety of packages in a broad range of temperatures. Meets the TLMI Recycling Protocol TLMI-LRP-2 for paper recycling compatibility.
0720M	-20°F -29°C	-65° to +180°F -54° to +82°C	A versatile cold-temperature acrylic adhesive that adheres to many packaging materials in a broad range of temperatures. Faster stripping than many cold-temp adhesives. Meets the TLMI Recycling Protocol TLMI-LRP-2 for paper recycling compatibility.
0720G	-20°F -29°C	-65° to 180°F -54° to +82°C	A versatile cold-temperature acrylic adhesive that adheres to many packaging substrates in a broad range of temperatures. Faster stripping and cleaner converting than many cold-temp adhesives. Meets the TLMI Recycling Protocol TLMI-LRP-2 for paper recycling compatibility.
00853	0°F -18°C	-50° to +125°F -46° to + 52°C	A cold-temperature acrylic adhesive, designed to run cleanly on press. Perfect for weigh scale applications.
0976S	-20°F -29°C	-65 to 180°F -54 to 82°C	All-temperature acrylic adhesive designed for PET, Colored HDPE, and PP recycling. Will wash off PET clamshells, bottles, and other containers. Carries APR critical guidance approval for PET, Colored HDPE and PP recycling when paired with clear, white, and metalized BOPP films.
PERMA	NENT		
00103	+40°F + 4°C	-65° to +200°F -54° to +93°C	A soft, high performance film label acrylic adhesive with excellent clarity and adhesion to low energy surfaces, along with outstanding wet-out.
00406	+10°F -12°C	-40° to +300°F -40° to +150°C	A permanent acrylic adhesive designed for film face stocks used in durable applications. Has high tack and excellent adhesion to low energy surfaces. An environmentally-friendly alternative to solvent adhesives.
00504	+35°F + 2°C	-40° to +160°F -40° to +71°C	A general purpose acrylic emulsion used primarily with paper substrates.
00506	+45°F + 7°C	-65° to +200°F -54° to +93°C	A general purpose acrylic emulsion adhesive with good UV stability. Non-yellowing, and generally used with film face stocks.

Green Bay Packaging Inc. Coated Products Operations

Minimum

	Minimum Application	Service Temp	
	Temp	Range	Description
PERMA	NENT (cont.)		
I LIXIVIA	INENT (COIII.)		
00508	+45°F + 7°C	-65° to +200°F -54° to +93°C	A hard, acrylic adhesive. Useful for prime label pharmaceutical (pill bottles). Good for curved surfaces greater than 1/2" diameter requiring mandrel hold. Offers some reposition time on low-energy plastics. Glove friendly.
00515	+40°F +4°C	-40° to +250°F -40° to +121°C	A permanent, acrylic adhesive that has good water whitening resistance and adheres well to low surface energy plastics. Good combination of quick tack and high shear makes it ideal for mailing tabs.
00525	+45° F +7°C	-65°F to +200°F -54°C to +93°C	A general purpose permanent, pharmaceutical acrylic adhesive. A higher coat weight version of 508. This adhesive is ideal for rough surfaces. Holds tight in difficult, small diameter applications. Repositionable on some surfaces.
00600	-10°F -23°C	-50° to +125°F -46° to +52°C	A permanent acrylic adhesive, which removes from glass bottles in a 100°F water bath. Designed for wine and other beverage labeling. Can be used in a wide range of temperatures, including cold applications. Removal times depend on facer and bottle type.
00700	+35°F +2°C	-65° to +200°F -54° to +93°C	A general purpose acrylic emulsion for paper. Repositions on many low energy plastics.
00747	0°F -18°C	-65° to +200°F -54° to +93°C	A general purpose, acrylic permanent that displays excellent adhesion over a broad temperature range while providing aggressive performance. Perfect for wine labeling, as it can withstand ice bucket conditions.
00751	+45°F +7°C	-65° to +200°F -54° to +93°C	A paper and film compatible acrylic with good adhesion to many substrates. Excellent die-cutting and stripping. Exceptional mandrel hold.
00950	25°F -4°C	-40° to +160°F -40° to +71°C	General purpose filmic adhesive designed for prime label applications. High shear properties leading to excellent press convertibility. Provides good open time for label repositioning. Performs at application temperatures as low as 25°F. Meets APR Preferred Design for Recycling on HDPE (colored) and PP substrates.
00960	14°F -10°C	-40° to +160°F -40° to +71°C	General purpose filmic adhesive designed for prime label applications. Excellent clarity and improved blush resistance. Higher shear film adhesive for improved press convertibility. Performs at application temperatures as low as 14°F. Meets APR Preferred Design for Recycling on HDPE (colored) and PP substrates.
0758M	+35°F +2°C	-65° to +200°F -54° to +93°C	An acrylic general purpose permanent adhesive with great die-cutting and stripping properties. Adheres well to many substrates, including corrugated.

Green Bay Packaging Inc. Coated Products Operations

	Minimum Application Temp	Service Temp Range	Description
PERMA	NENT (cont.)		
0776S	+25°F -4°C	-65° to +200°F -54° to +93°C	A general purpose acrylic adhesive designed for PET recycling. Will wash off PET clamshells, bottles, and other containers during recycling leaving no adhesive residue behind. When combined with specific facers it has APR Critical Guidance Recognition.
767HM	+20°F -7°C	-65° to 165°F -54° to 79°C	A highly versatile rubber-based hot melt adhesive with quick tack. It stands up to moisture and adheres securely to both low-energy and textured surfaces.
REMOV	/ABLE		
00272	+20°F -7°C	-10° to +120°F -23° to +49°C	Non-toxic paper removable microsphere acrylic adhesive with good clean removal. Great choice for kiddie stickers, business forms, and price labels.
00275	+35°F +2°C	+20° to +120°F -7° to +49°C	Most universal acrylic microsphere adhering to corrugated, glass, metal, and plastics. No residue on glass or credit cards. Repositionable. Not recommended for small labels, or flood coated applications. Repulpable when applied to paper face stocks.
00278	+20°F -7°C	-10 to +120°F -23 to +49°C	Ultra-removable microsphere acrylic adhesive for paper face stocks. Adheres to, and removes cleanly from, a variety of substrates. Perfect for kiddie stickers, and short-term labeling such as price marking, promotions, and logistics.
00347	+35°F +2°C	-40° to +180°F -40° to +82°C	Specialized removable acrylic for film face stocks. Has low peel and no-build properties. Designed for clean and easy removal from glass even after extended periods of time and temperature changes.
00531	+40°F +4°C	0° to +140°F -18° to +60°C	General purpose removable acrylic adhesive for use with paper or film face stocks. Removes from some glass, plastic, and textile surfaces.
00532	+35°F +2°C	-40° to +160°F -40° to +71°C	Textile acrylic adhesive that removes cleanly from most fabrics. Not recommended for leather, suede or silk. Be sure to test. All textile applications are different.
00538	+45°F +7°C	0° to +160°F -18° to +71°C	A moderate-to-tight acrylic removable for use with films and strong paper face stocks.
00611	+21°F -6°C	-40° to +172°F -40° to +78°C	A water dissolvable acrylic adhesive. It adheres to, and washes off, many substrates including most plastics, stainless steel and glass. Combined with the dissolvable facer, H2ODP, the label disappears in 30 seconds. Can be used with other face stocks.

Green Bay Packaging Inc. Coated Products Operations

	Minimum Application Temp	Service Temp Range	Description
REMOV	ABLE (cont.)		
00633	30°F -1°C	-65° to +200° F -54° to +93° C	An aggressive removable acrylic adhesive with a clean release for paper and film labels. It adheres to, and removes from, a wide variety of surfaces. Does not ghost. Good mandrel hold. Ideal for resealable closure labels.
00805	0°F -18°C	-50° to +125°F -46° to +52°C	A lighter tack acrylic adhesive for kiddie stickers. Can also be used for other applications requiring short-term removability. Works in a wide range of temperatures.
80361	0°F -18°C	-50° to +125°F -46° to +52°C	Acrylic adhesive designed for short-term removability. Consider for kiddie stickers.
RECYC	LABLE		
00611	+21°F -6°C	-40° to +172°F -40° to +78°C	A water dissolvable acrylic adhesive. It adheres to, and washes off, many substrates including most plastics, stainless steel and glass. Combined with the dissolvable facer, H2ODP, the label disappears in 30 seconds. Can be used with other face stocks.
00720	-20°F -29°C	-65° to +180°F -54° to +82°C	A soft, general purpose, all-temperature acrylic adhesive for paper and film labels. Adheres to a variety of packages in a broad range of temperatures. Meets the TLMI Recycling Protocol TLMI-LRP-2 for paper recycling compatibility.
00757	+32°F +0°C	-58° to +199°F -50° to +93°C	A permanent acrylic adhesive with an aggressive bond to many surfaces, including low-energy plastics and corrugated. Harder adhesive for clean converting. Meets the TLMI Recycling Protocol TLMI-LRP-2 for paper recycling compatibility.
0720G	-20°F -29°C	-65° to 180°F -54° to +82°C	A versatile cold-temperature acrylic adhesive that adheres to many packaging substrates in a broad range of temperatures. Faster stripping and cleaner converting than many cold-temp adhesives. Meets the TLMI Recycling Protocol TLMI-LRP-2 for paper recycling compatibility.
0720M	-20°F -29°C	-65° to +180°F -54° to +82°F	A hard, versatile cold-temperature acrylic adhesive that adheres to many packaging materials in a broad range of temperatures. Faster stripping than many cold-temp adhesives. Meets the TLMI Recycling Protocol TLMI-LRP-2 for paper recycling compatibility.
0776S	+25°F -4°C	-65° to +200°F -54° to +93°C	A general-purpose acrylic adhesive designed for PET recycling. Will wash off PET clamshells, bottles, and other containers during recycling leaving no adhesive residue behind. When combined with specific facers it meets APR Critical Guidance protocol.

LINER SELECTION GUIDE

Title	Code	Target (Mils) (Microns)	Description
PAPER ROLL-TO-ROLL			
1.7 MIL WHITE GLASSINE	17GL	1.7 43.0	A 28# (45 g/m²) white glassine provides an excellent surface for die-cutting. The thinner gauge allows more labels on a roll, and the lighter weight provides lower shipping costs saving you and your customers time and money.
2.4 MIL NATURAL KRAFT LINER	39NK	2.4 61.0	Produced without bleaching, this is a more environmentally-friendly, 39# (64 g/m²) super calendered densified kraft liner offering good die-cutting and stripping. Can be recycled with corrugated.
2.4 MIL SEMI-BLEACHED DENSIFIED KRAFT	40SC	2.4 61.0	A white densified kraft sheet 41# (67 g/m²) with excellent point-to-point caliper control.
41# WHITE KRAFT LINER	41WK	2.7 69.0	A premium, 41# (66 g/m²) white kraft liner that is designed for roll-to-roll and fan-fold applications. Outstanding performance die cutting both paper and film.
3.2 MIL SEMI-BLEACHED DENSIFIED KRAFT	50SC	3.2 81.0	A white densified kraft sheet 53# (86 g/m²) with excellent point-to-point caliper control.
PAPER ROLL-TO-SHEET			
3.4 MIL LASER LINER	0PBLF	3.4 87.0	A premium, 50# (82 g/m²) white kraft liner that is designed for roll-to-sheet and fan fold applications. Ideal for smooth feeding in desktop laser and inkjet printers. Suitable for die cutting both paper and film.
3.2 MIL CLAY COATED LAY FLAT	0PRLF	3.2 82.0	A premium, 53# (87 g/m²) white kraft liner. Suitable for roll-to-sheet and fan fold applications. Designed for four-color process printing on the back side. Can be used for die cutting both paper and film.
3.2 MIL KRAFT LAY FLAT	32KLF	3.2 81.0	Designed for roll-to-sheet and fan fold applications, 32KLF is a premium, white kraft 45# (73 g/m²) liner. It is back side printable. This liner can be used with both paper and film facestocks.
2.7 MIL LASER LINER	41LF	2.7 69.0	A premium, 41# (66 g/m²) white kraft liner that is designed for roll-to-sheet and fan fold applications. Ideal for smooth feeding in desktop laser and inkjet printers. Suitable for die cutting both paper and film.
3.2 MIL PRINTABLE LAY FLAT LINER	53CRT	3.2 81.0	A 54# (88 g/m²) blue-white kraft liner. Good dimensional stability for roll-to-sheet lay flat applications. Features a coated back side for a premium appearance and flexo printability. Suitable for charity mailing labels.

LINER SELECTION GUIDE

Title	Code	Target (Mils) (Microns)	Description
PAPER ROLL-TO-SHEET (cont.)			
3.5 MIL CLAY COATED LAY FLAT	60LF	3.5 88.0	A 56# (92 g/m²) liner with high white visual appeal. Ideal for sheeted or fan fold applications. Designed for four-color process printing on the back side.
4.6 MIL LAY FLAT LINER	74LF	4.6 117.0	A white 74# (121 g/m²) kraft liner that offers good dimensional stability for roll-to-sheet applications. Perfect for facer materials and applications that need extra rigidity to lay flat.
FILM			
1.2 MIL CLEAR POLYESTER	12NB	1.2 30.0	Clear polyester with an excellent surface for die-cutting. Great strength for high speed converting and application.
1.2 MIL CLEAR POLYESTER	12PE	1.2 31.0	Clear polyester liner with a firm surface for die-cutting. Easy release for high speed converting and application.
1.4 MIL CLEAR POLYESTER	15PT	1.4 36.0	Clear polyester liner with an excellent surface for die-cutting and high speed automatic applications.
.92 MIL CLEAR POLYESTER	92NB	0.9 23.0	Clear polyester with an excellent surface for die-cutting. Great strength for high speed converting and application. The benefits of this thinner gauge liner include reducing plastic use, decreasing shipping weight, and allowing more labels on a roll.
POLY KRAFT			
3.1 MIL NATURAL KRAFT/POLYPROPYLENE	44PM	3.1 72.0	A 44# (72 g/m²) natural kraft liner extrusion coated with polypropylene. Designed to prevent V-type tears and is an excellent choice for high speed automatic applications. Commonly used in wine label applications.

INK JET / LASER

Recommendations for Storage and Handling of Layflat Label Material

- * Good layflat performance can be expected when label stock is converted in an environment where the temperature range is between 60 and 80 degrees Fahrenheit (16 and 27 degrees Celsius) and the relative humidity is between 40% and 60%.
- * The material should be allowed to acclimate to your facility's environmental conditions for three days before it is converted.
- * Keep rolls off of concrete floors and away from any other sources of moisture contamination.
- * Rotate your stock. Use oldest inventory first.
- * Avoid long-term storage. For best results, material should be utilized by the end-user within six months of manufacture.
- * INK JET and LASER products are recommended on 6 inch O.D. cores to minimize core related curl. Layflat is affected by small cores. Customer accepts responsibility of curl if taken on 3 inch cores.

50# LASER JET WITH 100% PCW

A 50# (74 g/m²) multi-purpose facer for laser and inkjet printing. Produced with 100% post-consumer waste. Has a bright, white color, so it is attractive while helping the environment. FSC® certified.

INK JET / LASER

Recommendations for Storage and Handling of Layflat Label Material

- * Good layflat performance can be expected when label stock is converted in an environment where the temperature range is between 60 and 80 degrees Fahrenheit (16 and 27 degrees Celsius) and the relative humidity is between 40% and 60%.
- * The material should be allowed to acclimate to your facility's environmental conditions for three days before it is converted.
- * Keep rolls off of concrete floors and away from any other sources of moisture contamination.
- * Rotate your stock. Use oldest inventory first.
- * Avoid long-term storage. For best results, material should be utilized by the end-user within six months of manufacture.
- * INK JET and LASER products are recommended on 6 inch O.D. cores to minimize core related curl. Layflat is affected by small cores. Customer accepts responsibility of curl if taken on 3 inch cores.
